

Merk: **Andersen Shopper**

Model: 164-036-72

€ 214,95

Omschrijving

The Royal Shopper® with ball-bearing whisper wheels is particularly quiet and, thanks to its manufacture from high-quality aluminium, also very light with a tare weight of 2.9 kg. The Royal Shopper® can be attached as a bicycle trailer to almost any standard bicycle with the help of the specially developed Bike & Easy coupling system. With a total load capacity of 50 kg, even heavy loads are no problem for the Royal Shopper®.

The matching Hydro 2.1 Shopper® bag leaves nothing to be desired. The Hydro 2.1 offers plenty of storage space with its large bag, an inside pocket and two side pockets. An additional thermo compartment keeps drinks cool for a long time and frozen products fresh. The bag is water-repellent and dirt-resistant thanks to its material composition. The special feature of the Hydro 2.1 is the rucksack function, which turns a shopping trolley into a large rucksack for shopping, family and leisure.
